IT

Presenting Your IT Incident Report

From Writing to Speaking · A Pair Task · CEFR B1+

Inglés Profesional · ASIR / DAW · Networking & IT Vocabulary

1 From Page to Presentation

You have written your report. Now you will **tell** it to an audience. The content stays the same, but the way you say it changes.

	Written report	Spoken presentation
Audience	One reader, alone	A live group, listening once
Tone	Formal, lots of passive voice	Professional but natural
Sentences	Long and complete	Short and clear
Structure	Paragraphs	Signposts: “Now let’s look at…”

2 The Task

In pairs, present **ONE** incident report to the class. Choose the better of your two reports, or combine the best ideas from both.

2
students per pair

3 min
presentation — you both speak

1 min
questions from the audience

3 Who Says What?

SPEAKER A

Introduction + Actions Taken

Greet the audience, introduce yourselves and explain the problem: when, where and what.

Then explain, step by step, what the technician did.

SPEAKER B

Result + Recommendation

Describe what happened after the actions. Is everything working again?

Suggest how to prevent it, close the talk and invite questions.

Handover: Speaker A finishes the actions and passes the turn to Speaker B.

4 Getting Ready — 15 Minutes

1	**Compare · 4 min**	Read both reports aloud to your partner.
2	**Choose · 2 min**	Pick the clearer report, or combine the best ideas.
3	**Divide · 1 min**	Speaker A takes parts 1–2, Speaker B parts 3–4.
4	**Cue cards · 5 min**	Write keywords only — no full sentences.
5	**Rehearse · 3 min**	Practise the handovers and check your time.

5 Signposting — Guide Your Audience

Opening

“Good morning, everyone. I’m ___ and this is ___.”

“Today we are going to present an incident report about ___.”

Handing over

“Now ___ is going to explain what the technician did.”

“Thank you, ___. Let me tell you about the result.”

“Moving on to our recommendation…”

Closing

“To sum up, ___.”

“Thank you for listening.”

“Do you have any questions?”

6 From Written to Spoken

WRITTEN
"A network problem was reported by the sales department on Friday."

SPOKEN
"So, on Friday, the sales department told us about a network problem."

WRITTEN
"The firewall blocked the connection."

SPOKEN
"The firewall — that's the system that blocks unwanted traffic — blocked the connection."

WRITTEN
"It is recommended that all updates be tested on a backup server."

SPOKEN
"Our advice is simple: test every update on a backup server first."

7 Delivery Tips

Don’t read your report
Look at your cue card, then look up and speak.

Look at your audience
Make eye contact with different people in the room.

Slow down and pause
Pause after each part. Silence is not a problem.

Speak up
The person at the back must hear every word.

8 Pronunciation — Past Simple -ed

Your report is in the past simple, so you will say a lot of **-ed** endings. They sound different:

/t/

after p, k, s, sh, ch, f

checked
fixed
crashed
backed up

/d/

after other sounds and vowels

configured
restored
logged in
rolled back

/ɪd/

after t and d — an extra syllable!

restarted
detected
reported
updated

9 Questions & Answers

Asking (audience)

“How long did the outage last?”

“Why did the technician decide to ___?”

“What would you do differently next time?”

“Could you explain what ___ means?”

Answering (presenters)

“That’s a good question.”

“As we said in our report, ___.”

“I’m not completely sure, but I think ___.”

“Let me ask my partner to answer that.”

Rule: every pair in the audience asks at least ONE question.

10 Example Cue Cards — Option B

Based on the model answer (virus in the IT lab). **Keywords, not sentences.**

A · INTRODUCTION

- Hello · I'm ___ & ___
- Wednesday morning
- virus → IT lab PC
- antivirus alert
- spread → 2 more PCs

A · ACTIONS

- disconnected infected PCs
- stop spreading
- full antivirus scan
- removed infected files

B · RESULT

- network safe
- after 2 hours
- classes continued next day

B · RECOMMEND.

- automatic scans every week
- detect sooner
- sum up · thank you
- any questions?

11 How You Will Be Assessed

Criterion	What we look for	Points
Content & structure	All four parts, in a logical order	/2
Language	Technical vocabulary, linking words, passive voice where it fits	/2
Fluency & delivery	Speaks without reading, clear voice, eye contact	/2
Pronunciation	Technical words and -ed endings are clear	/2
Teamwork & Q&A	Smooth handover, both partners speak, answers questions	/2
Total		/10

12 While You Listen

Take notes

1. What was the problem?
2. One action the technician took.
3. What was the result?
4. Their recommendation.
5. One good technical word or linking word they used.

Two stars and a wish

- ☆ *“I liked how you ___.”*
- ☆ *“You used ___ very well.”*
- *Wish: “Next time, you could ___.”*
