Elevator Pitch: Student Worksheets

Overview

In four sessions you will build and deliver a 60–90 second elevator pitch in English for one real tech job. ASIR students aim at a networks and systems job; DAW students aim at a web development job. Keep all your work in one folder or file: you will reuse it every session.

Session	Focus	What you hand in
1 · Explore	Videos, your target job, a real job offer, key vocabulary	Job offer + word bank (15 words)
2 · Design	Your profile, phrases and grammar, first script	Script, version 1
3 · Prepare and rehearse	Corrections, pronunciation, cue card, group feedback, recruiter questions	Script, version 2 + cue card
4 · Present	Final pitch in front of the class + questions	Your pitch + self-assessment

Final product: an individual oral pitch in English, 60–90 seconds (about 130–200 words), followed by one or two questions from a "recruiter". Use the class presentation for vocabulary, phrases and model pitches.

Session 1 · Explore

Goal: choose your target job and collect the words you need to talk about it.

Warm-up (10 min)

In pairs: have you ever introduced yourself to someone important (a teacher, an employer, a client)? What did you say? What would you say now?

Task 1 · Watch (20 min)

Watch the two videos from the presentation:

1. Elevator pitch. Tienes 20 segundos (Spanish)
2. Elevator pitch examples (English)

With a partner, complete this sentence in English: *An elevator pitch is…*

Task 2 · Choose your target job (15 min)

Choose one job from the presentation or a similar one.

- ASIR: IT support technician, junior systems administrator, network technician, junior cybersecurity analyst, cloud support associate
- DAW: junior front-end developer, junior back-end developer, full-stack developer (trainee), web developer intern, QA tester

My target job: _____

I chose it because _____

Task 3 · Read a real job offer (35 min)

Find one real offer in English for your job on LinkedIn Jobs, Indeed or EURES. Copy the link and complete the table.

Question	Your answer
Link to the offer	
Company and location	
Job title	
Three main tasks	
Three technical skills required	
Two soft skills required	
One thing in the offer you can already do	
One thing you still need to learn	

Task 4 · Build your word bank (25 min)

Collect 15 words or expressions from the offer and from the presentation: 8 technical (verb + noun, for example *configure switches*, *build responsive websites*), 4 soft skills and 3 job words (for example *internship*, *entry-level*).

English	Spanish	My sentence
configure switches	configurar switches	I can configure switches and VLANs.

Exit ticket (5 min)

Say it aloud to a partner: *I'd like to work as a _____ because _____.*

- ☐ Job offer saved
- ☐ Word bank with 15 entries

Session 2 · Design

Goal: turn your profile into a first script with the five parts.

Warm-up · Grammar check (10 min)

Put the verb in the correct form.

1. I _____ (study) Web Application Development at Campus Digital FP.
2. At the moment I _____ (learn) Docker.
3. I _____ (build) three websites so far.
4. Last year I _____ (set up) a home lab with two virtual servers.
5. I'm good at _____ (solve) technical problems.
6. I'd like _____ (work) as a junior systems administrator.

Task 1 · My profile (20 min)

Use your work from IPE I. Every strength needs proof.

	In English	Proof: when and what?
Strength 1		
Strength 2		

	In English	Proof: when and what?
Strength 3		
Technical skill 1		
Technical skill 2		
One experience (class project, job, hobby)		

Task 2 · Analyse a model (15 min)

Read the model pitch for your course (ASIR or DAW) in the presentation.

- Mark the five parts: intro, goal, skills, proof, close.
- Underline one example of each tense from the warm-up.
- Circle the technical words. How many are there?

Task 3 · Choose your phrases (15 min)

From the "Useful phrases" slides, choose one phrase for each part and write it in your script table below.

Task 4 · Write version 1 (45 min)

Write your script in English. Your teacher will check it in Session 3.

Part	Time	My text
1. Introduce yourself	10–15 s	
2. Your goal	10–15 s	
3. Your skills	20–25 s	
4. Your proof	15–20 s	
5. Close	5–10 s	

Your script must have:

- ☐ 130–200 words
- ☐ The name of your target job
- ☐ At least five technical words
- ☐ One real example in the past simple

- ☐ A clear next step at the end (CV, portfolio, interview)

Exit ticket (5 min)

Read parts 1 and 2 aloud to a partner. Your partner says the job you want.

Session 3 · Prepare and rehearse

Goal: polish your script, practise it aloud and get feedback.

Warm-up · Find the mistake (10 min)

Correct these sentences. Then check your own script for the same mistakes.

1. I have 19 years.
2. I want to do practices in a tech company.
3. I'm good in networks.
4. I have experience configurating servers.
5. I'm very interesting in web design.
6. Actually, I'm learning Python. *(meaning: at the moment)*

Task 1 · Correct your script (15 min)

Use your teacher's feedback and the warm-up to improve version 1. Check tenses, prepositions (*good at*, *interested in*) and false friends (*career*, *practices*, *actually*).

Task 2 · Pronunciation (15 min)

- Write five key words from your script and CAPITALISE the stressed syllable (for example de**VEL**oper, ad**MIN**istrator).
- Mark a pause / between the five parts.
- Practise the tricky words from the presentation: *cache*, *suite*, *router*.

Task 3 · Make a cue card (10 min)

Reduce your script to a maximum of 15 keywords on one card. In Session 4 you can only use the cue card, not the full script.

Task 4 · Rehearse in groups of three (30 min)

Take turns. The speaker gives the pitch. The recruiter times it and asks one question. The observer completes the checklist and gives feedback. Then rotate.

Checklist	Yes	Not yet
60–90 seconds		
Five parts, in order		

Checklist	Yes	Not yet
Names one real job		
Five or more technical words		
One concrete example in the past		
Clear next step at the end		
Eye contact, not reading		

One thing that worked: _____

One thing to improve: _____

Task 5 · Prepare for questions (15 min)

Choose two questions and write short answers (two or three sentences each).

- Why are you interested in this role?
- What is your strongest technical skill?
- Tell me about a problem you solved.
- What are you learning at the moment?
- How do you work in a team?
- Where do you see yourself in two years?

If you don't understand a question: *Sorry, could you repeat that, please?* · *Do you mean…?* · *That's a good question. Let me think…*

Task 6 · Version 2 and recording (15 min or homework)

Write version 2 with the feedback from your group. Record yourself on your phone and check the time.

- ☐ Script, version 2
- ☐ Cue card
- ☐ Answers to two questions

Session 4 · Present

Goal: deliver your pitch to a "recruiter" and answer their questions.

Warm-up · Last run (10 min)

In pairs, give your pitch once with your cue card only. Your partner times it.

Task 1 · Final pitches (70 min)

Stand up, greet the recruiter and give your pitch (60–90 seconds). Then answer one or two questions. You can use your cue card, not your script.

While you listen, take notes on three classmates your teacher gives you.

Classmate	Target job	Best technical word	Their example (proof)

Task 2 · Self-assessment (15 min)

Score yourself from 1 (not yet) to 4 (very well).

I can…	1–4
give a clear pitch with five parts in 60–90 seconds	
use correct technical vocabulary for my job	
speak fluently and link my ideas	
use a polite, professional register	
answer a recruiter's question	
keep eye contact and not read	

Task 3 · Reflection (10 min)

Answer in English, two or three sentences each.

1. What was the most useful phrase or word you learned?
2. What will you improve before a real interview?
3. Where could you use your pitch outside class (a job fair, LinkedIn, your work placement)?

- ☐ Pitch delivered
- ☐ Notes on three classmates
- ☐ Self-assessment and reflection

Notas para el docente

Cada sesión está calculada para 2 horas (unos 110 minutos de tareas), que es la duración de vuestras sesiones de Inglés en ASIR y DAW. Cuatro sesiones encaja en las 3–5 que propone el documento de IPE I. En la sesión 4 se calculan unos 3 minutos por alumno (pitch, preguntas y cambio), así que para 25 alumnos o más hace falta parte de una quinta sesión.

Sesión	RA y CE de Inglés (RD 659/2023)
1 · Explore	RA1 a, c (vídeos) · RA2 a, c, h (oferta de empleo)
2 · Design	RA4 a, c (guion escrito) · RA3 e (terminología)
3 · Prepare and rehearse	RA3 b, d, e, g, i, k · RA5 b
4 · Present	RA3 c, d, e, h, i, k · RA5 e

Encaje C-T-E. Inglés se integra en un reto compartido con IPE I, del lado de Empleabilidad (E). En la programación sigue pendiente si el Reto 4 (IT jobs) se comparte con IPE I, así que no lo doy por cerrado.

Pendiente de decidir con tu compañera:

- Pesos y rúbrica de Inglés. La autoevaluación de la sesión 4 sigue los criterios de la presentación, pero no lleva nota.
- Si el borrador se escribe primero en castellano en IPE I. Las fichas suponen que la versión 1 ya se escribe en inglés.

Soluciones · Sesión 2, warm-up: 1 study · 2 ’m learning · 3 ’ve built · 4 set up · 5 solving · 6 to work.

Soluciones · Sesión 3, warm-up: 1 I’m 19. · 2 I want to do an internship. · 3 I’m good at networking. · 4 experience configuring servers · 5 interested in · 6 Currently / At the moment, I’m learning Python.
